90% of participants **strongly** believe that the program will improve the overall customer experience for women.

92% of participants **strongly** believe that the Women's Choice Award program was a worthwhile investment for the dealership.

“
In today's market, people need to be treated with respect and integrity. Upon entering the dealership, the WomenCertified program teaches these comprehensive principles and tools on the “selling to women” program to our sales and service staff. By using these guidelines that are the basis for an outstanding customer service experience, we have established a practice of providing women (and men) with the kind of service experience they refer and recommend to their family and friends.”
